PROFESSIONAL SUMMARY

Information Systems undergraduate at Universitas Bina Sarana Informatika with a perfect GPA of 4.00 and hands-on experience as a Freelance Full Stack Developer. Proficient in modern web and mobile application development using Laravel, React, Next.js, Vue.js, and Flutter. Experienced in independently delivering complex projects — from backend system design, REST API development, to interactive frontend and mobile applications — with a strong focus on application performance, security, code scalability, and user experience. Proven track record of building end-to-end systems including dealer management platforms, service booking apps, and real-time ticketing systems ready for production environments.

WORK EXPERIENCE

Freelance Full Stack Developer | Self-Employed Dec 2024 – Present

- Developed and maintained various Single Page Application (SPA)-based web and mobile apps tailored to client needs using Laravel, React, Next.js, and Flutter.
- Translated business requirements into functional technical solutions, including REST API integration, Payment Gateway (Midtrans), authentication, and complex database management systems.
- Ensured high code quality — clean code, type safety with TypeScript — while optimizing for application performance, UI responsiveness, and user experience.
- Successfully delivered several mid-scale projects including a dealer & workshop management system, a mobile service booking app, and a real-time ticketing and fleet management platform.

EDUCATION

Bachelor of Information Systems | Universitas Bina Sarana Informatika Sep 2024 – Present

- GPA: 4.00 / 4.00
- Focus: Web & Mobile Application Development, Relational and NoSQL Databases, REST API, System Analysis and Information Systems Design.

KEY PROJECTS

SRB Motor V3 — Dealer & Workshop Management System Nov 2025 – Present

<https://github.com/Rangga11268/SrbMotorV3>

Tech Stack: Laravel, React.js, Inertia.js, MySQL, Midtrans Payment Gateway

- Built an integrated dealer and workshop management system using Laravel & React/Inertia.js to manage unit catalogs and workshop operations.
- Developed digital motorcycle sales features including an interactive catalog and a structured credit application system for customers.
- Implemented workshop operational automation covering online service booking, mechanic task management, and real-time job status monitoring.
- Integrated Midtrans Payment Gateway and automated notification system for payment invoices and vehicle document pickup scheduling (STNK/BPKB).

SRB Motor Mobile App — Mobile Dealer & Service Application Nov 2025 – Present

Tech Stack: Flutter, Dart, Provider, Laravel REST API, MySQL, Google Fonts, CachedNetworkImage

- Built a cross-platform (Android/iOS) mobile application as an all-in-one motorcycle dealer management solution with a premium Flutter UI.
- Implemented a smart service booking system with real-time branch selection, available time slot management, automated queue numbering, and digital service tickets.
- Developed a dynamic motorcycle catalog with category, branch location, and price range filters, supporting both cash and credit purchase flows with transparent cost breakdowns.
- Designed a modern custom design system using Glassmorphism, Dynamic Grids, and a Professional Color Palette to ensure consistent UI across all application modules.
- Integrated an automated notification system for order status updates and service reminders; optimized catalog image loading performance using CachedNetworkImage.

<https://github.com/Rangga11268/TunggalJayaTransport>

Tech Stack: Laravel, React.js, MySQL, OTP Verification, Payment Gateway

- Built a real-time bus ticket booking system featuring interactive seat selection and digital QR Code-based tickets.
- Implemented OTP verification and Payment Gateway integration to ensure secure and seamless transaction processing.
- Developed a Fleet Management module for centralized tracking of buses, drivers, and route schedules.
- Designed a Role-Based Access Control (RBAC) system to secure admin and operational data access.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), PHP, SQL, Python, TypeScript, Dart

Frameworks & Libraries: Laravel, React.js, Next.js, Vue.js, Flutter, Inertia.js, Tailwind CSS, Pandas, NumPy, Provider

Backend & Database: Node.js, REST API, MySQL, PostgreSQL, MongoDB

Tools: Git/GitHub, VS Code, Postman, Jupyter Notebook

CERTIFICATIONS

- Database Systems Competency Certificate — Issued by KOMUNITAS PHPID, July 2025
